

Cederic Bauer

I express a deep desire for the sport of Fencing to grow in Australia. I want to witness an increase of training and competition participation for all weapons and for this to occur across all states and territories for all age categories and levels of skill.

The growth of Fencing in Australia is a realistic and measurable goal. With faith, I say that promoting inclusiveness and accessibility for all persons, is the way forward to achieve this ambition of mine. I would like to help the Board by being available and reliable to communicate across ideas and issues experienced by Fencers. I would like to help Fencers by being open, patient and understanding.

Fencing means a great deal for me; as I write this, I find myself struggling to know where to start. It is zero understatement that Fencing is a beautiful and incredible sport. I have been fencing for 18 continuous years since the age of 9 and I rely on this sport as a holistic way of maintaining my happiness and health. Fencing is consistent at providing me with abundant opportunities and challenges that promote my well-being by developing my character. I wish to share the joy of Fencing.

I believe that I would be a competent and worthy Athlete Commissioner for our community. I have already held in the past a Board position for Fencing WA. I am hard working and diligent and I pride myself with what I have already accomplished in various social, professional and academic domains. For your consideration I have highlighted all of this which can be found over on the next page. I would like to thank the current Board for their time being volunteers; their service, their passion for the sport and for what they have already accomplished.

My call to action is to heed to the needs of the community and to continue working hard to secure the future of this beautiful sport.
